GARDENING AIDS PRODUCT CATALOGUE

2026

CEO
Stefan Windhager

YOU CAN RELY ON US.

We are an innovative family company from Austria. Thanks to over 40 years of experience, we know exactly what matters. The best products for the home and garden and our partnership with trading partners and suppliers are the heart of our success.

As a family business, we are close to the customer and flexible enough to meet individual customer requirements. With the continuous expansion of our product range, the increase in storage space and modern logistics, we offer our customers the capacities of a large corporation at the same time.

WE ARE PERSONALLY AT YOUR SERVICE.

Our colleagues from Customer Service look forward to hearing from you.

OUR HISTORY

The cornerstone for the success of our family business was laid in Grödig in 1983 by Johann Windhager. We are still firmly rooted in the Salzburg region and proud of our strong growth and continuous expansion.

PERSONAL

As a family business with many years of experience Windhager is close to the customer and offers products that you can rely on.

THOUGHT OUT

Whether it's a classic or market-oriented innovation: Our products offer customers great benefits and meet the highest demands.

DIVERSE

The Windhager range includes ingenious and creative solutions for many challenges around the house and garden.

WINDHAGER
— GREENLINE —

Sustainability of our products

Sustainability has many faces. Many paths. Many possibilities.
This makes sustainability complex and exciting, but also challenging.

Windhager has been committed to dealing with the issue of sustainability responsibly for many years. This is not always easy, because the functionality and benefits of the products, including the affordability for the customer, are clearly in the foreground. You can easily recognize our sustainable products by the addition "Greenline" in the title.

MINIMAL PACKAGING:

Since 2014, the majority of Windhager films and fleeces have been packaged in cardboard instead of plastic. Wherever possible, we work with alternatives to plastics or reduce their proportion. Of course, the focus here is still on protecting the product.

DURABLE & REUSABLE:

Products that don't end up in the trash after one season are kind to the environment. Windhager relies on this longevity in individual product variants - here it is ultimately up to the customer how long the product remains in use.

REGIONAL:

Even if not everything can be obtained regionally: Windhager tries to keep the transport routes as short as possible. Products made from sheep's wool, for example, come from Austria, while the propagating trays and pots, as well as the mulch paper and the wood for many of the birdhouses, come from the EU.

NATURAL, RENEWABLE MATERIALS:

Products made of sheep's wool or jute, bast and hemp have been in the range for a very long time, and the variety of products is increasing - because they simply fit perfectly into the garden.

Sustainability on location

At the Thalgau location, sustainability is practised, among other things, through the most modern logistics concepts, the regular optimization of energy requirements and the installation of a photovoltaic system with around 380,000 kWh/year. E-vehicles (cars & bicycles) are also available to the Windhager team. In addition, the company provides every employee with the Salzburg climate ticket for one year.

NOVELTIES 2026

PEST CONTROL

more information
on p. 55

Raised bed snail protection wall and corners

art. no. 02447
art. no. 02448

Protection for raised bed - seamless and effective

The telescopic snail barrier (art. no. 02447) can be easily adjusted and cut to fit the size of your raised bed. It is screwed to the outer wall of the raised bed and prevents snails from reaching the plants. The snails will not be harmed. This snail barrier is weatherproof and can remain attached to the raised bed all year round. With the help of the matching corner connectors (art. no. 02448), the raised bed is reliably protected..

Vole and mole repellent MOLE STOP SOLAR PLUS

art. no. 02121

Pest control redefined

MOLE STOP SOLAR PLUS represents a new generation of effective protection against voles and moles based on more than 40 years of experience – the smart evolution of our tried-and-tested repellents MOLE STOP 1000 (art. no. 02120) and MOLE STOP SOLAR (art. no. 02125).

It repels voles, moles, snakes and other pests in or on the ground for the long term by transmitting powerful vibrations into the soil, without any poison or chemicals.

The integrated solar panel and USB-C port enable easy, battery-free charging. With a coverage area of up to 1,000 m² and long battery life of up to 7 days, MOLE STOP SOLAR PLUS can be used flexibly in any sunny spot in the garden. An LED display shows the selected intensity level.

ANIMALS IN THE GARDEN

Bird bath Badi

art. no. 07739

Decorative water source for birds

The compact bird bath Badi offers a simple solution for providing water on hot summer days. With the help of the Windhager wooden posts for gazing balls (art. no. 07962, 07963), it can be placed in the meadow, in a garden bed or in a larger plant pot. It can also be placed on a flat surface. A finely crafted bird silhouette gives the bird bath a special touch.

GARDENING AIDS

Rainwater butt shade

art. no. 07888

Clever cover for clean rainwater

The fine-meshed water butt cover reliably protects the water in the barrel from leaves and dirt. It prevents insects from laying eggs in the rainwater and keeps small animals such as frogs and mice away. For round and square water butts with a diameter of up to 95 cm.

PEST CONTROL

The lettuce and strawberries are planted, the lawn prepared and the pantry stocked. Actually, now it's time to sit back and relax. But just then they come around the corner and ruin all the joy: pests. Slugs eat their way through the vegetable patch, voles love to nibble roots and moles ruin the beautiful lawn. Our motto has always been: control pests cleverly and effectively, but gently for humans, pets and beneficial insects! Products that have been tried and tested for more than 40 years, as well as newly developed products help to repel moles, voles, mosquitoes, snails, wasps, martens, spiders and other pests without the use of chemicals.

Animal repeller GUARD SOLAR

- non-toxic dog, cat and marten repeller
- motion sensor activates ultrasound & flashing light
- ultrasound intensity and range adjustable
- includes suspension device and ground spike
- effective range: up to 60 m² ; radius of 8 m
- weatherproof housing
- 5 operating modes

No./Dim.	Info	EAN	
05045 6,5x8,5x13cm	incl. battery pack	 9 003117 050457	1

Animal repeller WATER GUARD SOLAR

- environmentally friendly dogs, cats, martens, raccoons, birds and wild animal repeller with solar energy supply
- motion sensor activates strong water jet
- includes ground spike and water connector
- effective range up to 90m² and radius of 10m
- water pressure and range adjustable (2 - 6 bar)

No./Dim.	Info	EAN	
05046 19x11,5x65cm	incl. battery pack	 9 003117 050464	1

Marten repellent downpipe belt

- defence belt for gutter downpipes prevents martens & similar animals from climbing up
- stainless steel spikes with plastic end caps to prevent injury
- simple, drill-free installation by connecting the individual elements together
- circumference adjustable using a tension spring, suitable for downpipes with a max. Ø 10 cm
- 2 parts per pack

No.	Content	EAN	
03126	2 PCE	 9 003117 031265	10

Marten control floor mat NO MORE BITE

- no installation or modification to the vehicle needed
- durable HDPE material
- flexible and portable repellent against cable-loving martens
- animals don't like running on grids
- the grid should be placed directly under the engine compartment for effective protection (mounting frame not included)
- animal-friendly alternative to electro-shock or ultrasound options

BIRDS & PIGEONS

Bird control system OWL

- detailed imitation owl with bobble head helps scare away magpies, 'fruit robbers', crows, ravens and pigeons
- a metal spring makes the head move in the wind in a natural way
- ideal for terrace, garden or balcony
- can be filled with sand or gravel for better stability

No./Dim.	EAN	📦
07102 15x40cm		1

Bird control system CROW

- multiple applications: to repel smaller bird species from vegetable gardens, car ports or as decoration
- can be installed hanging or standing
- made from weatherproof, shatter-proof plastic

No./Dim.	EAN	📦
07117 12,5x12,5x39,5cm		6

Bird & pigeon repeller: Starter set

- reliably repels pigeons and other birds
- basic set made from high-quality plastic, consisting of plug-in modules and spikes, including fixing material (screws, dowels)
- height of spikes: approx. 11 cm
- can be used permanently

No./Dim.	EAN

SEED SOWING & PROPAGATION

Whether courgettes, lettuce, tomatoes or cucumbers - vegetables simply taste better from your own garden. And isn't it wonderful to see the plants grow and flourish until they are ready to harvest?

The key to such a high yielding harvest is proper cultivation! With the seedling tablets and seed trays, the magic moment when the first leaves sprout from the soil is not too long in coming. If then the seedlings spend a while in the indoor greenhouse in an ideal microclimate, the foundation for vigorously growing plants is laid. The products in our range are made of different materials, in different designs and with or without a hood. This allows you to garden according to your individual preferences and circumstances! Now it's just a matter of waiting and watering to enjoy fresh vegetables soon.

PROPAGATORS & GREENHOUSES

Root trainer RootXtender

- 3-piece propagator for controlled cultivation of cuttings: Growing tray with space for up to 40 seedlings, lid with nodules for transplanting, base tub serves as water reservoir
- the shape of the seed tray promotes deep (conical) root formation creating less stress for plants when transplanting and faster growth in the new environment
- use with (nutrient-poor) seed compost
- production of own pellets possible for common hydroponic systems

SHEETING & FLEECES

Overgrown weeds and plants that just don't want to grow - these and other challenges quickly spoil the joy of having your own garden. But sheeting and fleeces turn out to be true superheroes!

The microclimate created by growing films and tunnels not only ensures faster plant growth, but can also increase yields. Weed mats put an end to uncontrolled weed growth and stabilise the soil, while a sandbox fleece extends the usability of play sand. Our product range also includes many natural arts made from renewable raw materials - in other words, everything the heart of sustainable gardeners desires.

WINTER PROTECTION

With the autumn days getting shorter and cooler, nature also comes to rest. Before winter gains a firm grip on the country, and on sensitive plants in particular, those which must stay outside need support during the winter. Fleece covers and mats ensure that the plants are well wrapped up, so that they can get through the cold season even in frosty temperatures. Winter protection solutions can be found here also for several large plants, shrubs and bulky treetops. Natural materials such as coconut fibre or sheep's wool offer a sustainable protection from icy wind and snow. Binding cords and ribbons are also wonderfully suitable for natural decorative arrangements - for example at the festive Christmas table.

WINTER
PROTECTION

ANIMALS IN THE GARDEN

Is there anything better than being woken up in the morning by the cheerful chirping of birds? Due to an increasingly dense development and fewer green spaces, unfortunately many animals find it difficult to find a place to retreat and sufficient food. Anyone who offers refuge and a feeding place to the colourful variety of domestic birds, squirrels, hedgehogs, wild bees and ladybirds in the garden or on the balcony is not only doing good, but can also enjoy a great sight.

W. DHAGER

GARDENING AIDS

The gardening aid range offers a practical solution for all gardening tasks: accessories for your raised bed, tying materials to support growing plants, bird nets to protect the harvest. Automatic water dispensers take over the watering during the holiday. Stick-in labels are decorative and informative. In autumn, harvest nets facilitate the collection of nuts and fruit, which are then stored in sustainable jute sacks. Our products are with you all year round.

GARDEN DESIGN

Our extensive range of garden design products ensures perfectly manicured outdoor areas. Flexible lawn edgings are particularly practical; flower bed borders made of natural materials such as bamboo or willow are a decorative way to create boundaries and borders. And for areas with heavy traffic (such as pool areas), a natural-looking artificial turf is ideal. Shapely trellises and planting sticks with interchangeable attachments are real eye-catchers and - in combination with the reflective balls - provide diverse possibilities for decorating the garden. This makes garden design fun!

TARPAULINS & COVERS

We cherish plants and gardens - but what about all the things that help us really enjoy the summer? The fireplace, sandpit and furniture are often used in summer and should be well protected in bad weather and after the season! Tarpaulins & covers in a wide range of sizes and designs are perfect for this. They can also be used for a wide variety of applications: from picnics to protecting the boot of a car to covering piles of firewood.

TARPAULINS & PROTECTIVE COVERS	256

PRIVACY SCREENS

A beautiful garden or balcony is the perfect place to enjoy warm days. But curious glances from neighbours or walkers often disturb the relaxed atmosphere. That's over now! Privacy mats for fences and balcony screens provide privacy and also protect against the wind. Materials such as reed, bamboo or willow also convey a feeling of holiday. Natural-looking privacy hedges bring more greenery into the garden or onto the terrace, while easy-to-clean plastic mats are particularly durable and stable. The privacy screen range simply offers the right solution for every taste and every outdoor space.

SUN PROTECTION

Windhager awnings expand the space outdoors! Stylish sun protection for the garden, balcony and terrace that is flexible and can be individually designed: this is the best way to describe our sun sails! Whether as a simple sail or with rope-pull technology, they offer an ideal protection from too much sun, too much UV radiations and too much heat. In their shade, you can enjoy the summer outside in a relaxed way. Visually, awnings create a wonderful holiday atmosphere - you can almost hear the sound of the sea.
